PROFILE SUMMARY

My early passion for technology has developed a strong ability for solving problems through innovative and creative approaches. Proficient in HTML, CSS, and JavaScript with hands-on experience from personal projects and coursework. Always learning to improve myself and the projects I'm working on. As a junior developer, I am eager to apply my technical skills and problem-solving abilities, and I am looking for an opportunity to contribute to a team and further develop my skills.

EDUCATION

University of Michigan   **Sep 2021 - May 2022**
Field of Study: Front-End Developer
Degree: Authorized Online Degrees by the University of Michigan

Upon completing the Web Development course for beginners, I acquired a range of new skills that I later deepened independently. I learned about the importance of web accessibility, HTML semantics, responsive design principles, as well as modern best practices for optimizing website performance and user experience. I engaged in discussions with my peers about the weekly course assignments, where we supported each other. If we were unable to find a solution, the teachers provided immediate assistance.
Key project: As part of the final project using HTML, CSS and JavaScript, I built a fully responsive website and met each requirement.

National High-School "Iulia Hasdeu"   **Sep 2015 - May 2019**
Profile: Human, Specialization: Philologists

Degree: Bachelor's degree

During high school, I consistently put effort into group projects, executing various projects and demonstrating strong teamwork skills. My personal projects were featured twice in the school magazine and I quickly adapted to collaborating with my colleagues.
I obtained a B2 level in English proficiency, with strong performance in speaking, reading, writing and conversation skills. In digital competences I achieved advanced proficiency, including Microsoft Office (Excel, PowerPoint, Word) and Microsoft PowerPoint / Microsoft Office Word / Excel / Google Drive.
